LONDON AND TONBRIDGE.

INDEX TO VOLUME XIV.

The Month. 1, 77, 157, 237, 317, 397

Special Articles.

Charing Cross Railway Station Disaster, The, 39
Coal Storage Plant, The Edison. By Our Special Correspondent, 31
Coast Erosion, The Prevention of. By Dr. J. S. Owens, B.A., A.M.Inst.C.E., F.R.G.S., 15, 175, 251, 331, 406
Concrete Steel Construction, Recent Examples of. By W. Noble Twelvetrees, M.I.Mech.E., 261, 328
Engine, The "Mees" Gas. By Dr. A. Gradenwitz, 166
Engine, Suggestions for the Construction of an Economical Steam. By C. H. B., 90
Engineers, The Education of, 429
Extension of the pv^i Exponential Expansion Law. By Robert H. Smith, 241
Foundations, Sub-Aqueous, with Recent Examples of the Use of Compressed Air. By J. E. Tuit, M.Inst.C.E., 5, 81
Gyroscopic Action of Turbine Rotors on Torpedo-Boat Design, The Effect of the. By A. H. Gibson, B.Sc., 401
Hypochlorite Solutions, The Commercial Value of Electrolytically Produced. By W. Pollard Digby, 35
Logarithmic Chart, The. By William J. Goudie, B.Sc., 161
Nitrates from the Atmosphere, The Electric Production of, 321
Relative Positions of Bogie to Underframe on Curves, The. By W. H. Holderness, 124
Sewage, Results of Recent Experience in the Bacterial Treatment of. By W. H. Maxwell, A.M.Inst.C.E., 92, 172, 257, 337, 415
Superheated Steam. By Michael Longridge, M.Inst.C.E., M.I.Mech.E., 178, 246
Superheated Steam, The Properties of, 101
Surface Condensers, Air in Relation to the Efficiency of. By James Smith, 341, 411
Surface Condensers, The Efficiency of. By Prof. R. L. Weighton, M.A., 418
Tramway Track Systems, New, 351
Workshops, The Design of Engineering. By H. Muncaster, 24, 86, 187, 268

Engineering Progress.

Alternator, A Self-Exciting, 299
Bacteria, The Nitrifying, 453
Barrier, The Outer, Hodbarrow Iron Mines, 304
Beams, Tests of Reinforced Concrete, 304
Bearing for High-Speed Work, A Subdivided Self-Aligning, 383
Boilers, Large Locomotive, 209
Brake, The Momentum, 298
Bridge, The Austerlitz, Paris, 118
Bridge, The Widnes and Runcorn Transporter, 302
Calculator, Piecework Balance and Premium, 117
Collieries, Electrical Developments in, 215
Dam, Completion of the New Croton, 381
Drill, A Petrol Rock-, 216
Engines, The 6,000 I.H.-P. Manchester Corporation, 191
Engines, Petrol: Rating by Cylinder Dimensions, 382
Forging Presses, 387
"G. B." Surface-Contact System at Lincoln, The, 116
H.M. Fleet Scout *Attentive*, 110
Heat at High Temperatures, The Transfer of, 385
Hydrocarbons, Explosive Combustion of, 456
Industry, Manchester's New, 45
Ingot, A Large Steel, 216

Engineering Progress.—*con.*

Internal Combustion Engine: The Specific Heat of, Heat Flow from, and Other Phenomena of, the Working Fluid in the Cylinder of the, 384
Keps at the Pit Eye, Substitute for, 350
Lamp, A New Electric Incandescent, 381
Lighting, Vacuum Tube, 217
Locking Bearing, A Novel, 214
Machine for Bending Tests, A New, 213
Machine, A Four-Spindle Automatic Screw, 121
Machine, Gigantic Testing, 303
Machine at Wolverton, Electric Welding, 43
Nitrates from the Atmosphere, The Electric Production of, 212
Noise from Machinery and its Injunction, 46
Pipes, Jarring in Steam, 458
Piston Block for an Air Compressor, 303
Pressure in Bearings due to Eccentric Loading, Variation of, 300
Pressure Drop through Poppet Valves, 113
Problem for Locomotive Engineers, The, 113
Railway, The Baker Street and Waterloo, 305
Railway, Nancy Electric Funicular, 454
Research Work at the National Physical Laboratory, 380
Resistance of Iron and Steel to Reversals of Direct Stress, On the, 386
Resistance of Tubes to Collapse, 216
Roller Bearings, The Friction of, 122
Slide Rule, A New, 455
Steam Turbines for the Bristol Corporation, 44
Subway, Handling Coal and Goods on the Chicago, 384
Suction Gas Producer, The "Watt," 42
Traffic, Modern, and Country Roads, 301
Tramways, Dartford, 218
Windmills for Electrical Supply, The Use of, 452

Locomotive and Railway Notes. By Charles S. Lake.

Boiler Pressures, Locomotive, 275
Boiler, The "Riegel" Water-Tube Locomotive, 440
Boilers, Large Locomotive, 361
Borries, August von, 359
Cars, Steam Rail Motor, Great Northern Railway, 129
Cars, Sterilising Railway, 198
Coaching Stock, Latest E.C.J.S., 52
Coaching Stock, New, Caledonian Railway, 358
Coaching Stock, New, Great Central Railway, 359
Compounds for the Midland, New, 359
Correspondents, Replies to, 196
Engines, Great Western Railway: New Passenger Tank, 432
Great Central Devolopments, 200
Great Central Route to London, The New, 53
Lathe, A Well-Designed High-Speed, 195
Locomotive Development on the Great Western Railway, Another, 129
Locomotive in Great Britain, The Compound, 48
Locomotive, Cape Government Railways Narrow Gauge, 437
Locomotive, A Heavy German-Built Compound, 438
Locomotive, A Remarkable German, 197
Locomotive, Heavy Shunting: New York Central Lines, 130
Locomotive "Secret" Revealed, A, 438
Locomotive Tests, American, 355
Locomotive with Thermal Storage Tank, Lancashire and Yorkshire Railway, 127
Locomotives, Great Central Railway, Compound, 193
Locomotives for Fast Goods Traffic, Great Southern and Western Railway of Ireland, 358

Index to Vol. XIV.

Locomotive and Railway Notes.—*con.*

Locomotives, New Great Central Express, 125
Locomotives, New Irish, 272
Locomotives in Japan, American, 52
Locomotives for the London, Brighton, and South Coast Railway, "Atlantic" Type, 198
Locomotives on the London and South-Western Railway, The New Four-Cylinder, 48
Locomotives, Midland Railway New Compound, 433
Locomotives for Service Abroad, Powerful British-built Tank, 53
Locomotives for Service Abroad, Recent British, 199, 276
Operation, The Cost of Locomotive, 194
Railway Club Journal, The, 278
Railways, Japanese, 359
Rolling Stock for London Underground Railways, 275
Smoke Deflector for Locomotives, A New Form of, 436
Staybolts for Locomotive Fireboxes, 274
Superheating of Steam, An American Locomotive Engineer on, 128
Wagons, English *v.* American Railway, 197, 278
Wagons, Rhodesia Railways Thirty-ton Bogie, 433
Wembley Cutting, Great Central Railway, 273

Automobile Engineering Notes. By Robert E. Phillips, M.I.Mech. E., etc.

Cars, Armoured Motor, 365
Cooling, Air, *v.* Water Cooling, 365
Cylinders, Oppositely Arranged Inclined, 201
Engine as a Brake, Using the, 279
Engine, The "Rolls-Royce" Eight-Cylinder, 281
Exhibition, Cordingley's Motor, 364
Gear, James and Browne Reducing, 280
Ignition, Generative Systems of Electric, 443
Motors, Four *v.* Six-Cylinder, 203
Notes on the Paris Salon de l'Automobile, 132
Omnibuses, Motor, 444
Radiator, The Sealed Tube, 444
Running on Snow, 282
Silencers, 202
Steam *v.* Petrol, 365
Tramcars for New Zealand, Motor, 201
Valve, The Auto-Mechanical Inlet, 442
Vehicle for Commercial Travellers, Motor, 202
Vehicles, Commercial, 55
Vehicles, Electric Heavy, 281
Vehicles, The "F.I.A.T." Commercial, 201

Electrical Notes. By Andrew Stewart, A.M.I.E.E.

Car, Petrol Electric Railway, 284
Cotton Mill, The First Electrically Driven British, 67
Cunarders, Electric Equipment of the New, 369
Furnace, The Production of Iron and Steel in the Electric, 219
Haulage on Canals, Electric, 147
Hoist, An Electrically Operated Blast Furnace, 146
Lamps, Flame Arc, 449
Lighting by Mercury Vapour Lamps, Exterior, 450
Locomotives for the New York, New Haven, and Hartford Railway, 447
Power from Blast Furnaces, Electric, 369
Power in the Factory, Electric, 65, 446
Power in Mining, Electric, 366
Power from the Victoria Falls, Electric, 145
Power Scheme, A British Hydro-Electric, 285
Traction on Main Line Railways, Electric, 67, 147, 286
Traffic by Electricity, The Handling of Freight, 282
Tunnel, The Electrification of the Simplon, 283

Abstracts from the Continental Press.

Accumulator Batteries as an Auxiliary in Gas-Driven Power Stations, 206
Alloys for Accumulator Grids, Resistance of Lead-Antimony, 62
Brakes, Failure of Tramway, 373
Bridge at Marseilles, Transporter, 373
Catcher for Tramcars, Mariage Automatic, 207
Coupling for Electromotors, A, 135
Crank for Explosion Motors, The Bréviaire Anti-Reversal, 64
Electric Railway Project for Hamburg, New, 65
Electrical Apparatus in Fiery Mines, Minimising Danger from, 451
Electrically Hauling Goods at a Profit on a Light Railway, 136
Engine, Trails with the "Schmidt" Express, 288
Gasholder Pit, Ferro-Concrete, 63
Grisson Gear for Electric Haulage in Collieries, 62
Hydro-Electric Installation at Clermont Ferrand, 62
Hydro-Electric Plant at Mezieres, 134
Hydro-Electric Station for supplying Toulon, 208
Lighting Trains by Electricity, 135
Locomotive, New Swedish, 64
Machine, Core Drill and Coal Cutting, 288
Machine for Fine Measurements, 373
Marine Boiler for Bituminous Coal or Oil Fuel, The Borowsky, 206
Pad for Motor Cars, Anti-Vibration, 137
Polyphase Motor Combination with Variable Speed, 135
Port Extensions at Genoa, 205
Protecting Ferro-Concrete Structures from Lightning, 64
Pumps at Nancy Waterworks, Electric, 451
Rail Joint, The Melaun Tramway, 453
Railway Motor, 15,000-Volt Alternating Current, 290
Roller Bearings for Tramcars, Experiments with, 291
Shield and Dust Exhaust for Grindstones, 288
Ship Lift, Helicoidal, 289
Sleeper, Compound Wood and Iron, 206
Sound-Deadeners for Tramcar Tyres, 289
Steam in Low-Pressure Turbines at Collieries, Utilising Exhaust, 371
Syphons of the Hamburg Main Sewer, Sinking the, 371
Telegraph Poles, Preserving, 451
Timbers, Impregnating Pit, 452
Train, Benzine Electric, 374
Tramways in Berlin, Projected Underground, 62
Trolley for Double Conducting Wires, Electric, 63
Tunnel of the Metropolitan Railway of Paris, Sub-River, 207
Viaduct and Jetty of Ferro-Concrete, 136
Water Tower at Florence, Ferro-Concrete, 134
Water Tube Boiler, "Plato," 373

Metallurgical Progress. By Percy Longmuir.

Foundry Practice, 59, 140, 227, 294, 378
Steel: its Properties and Treatment, 59, 141, 223, 297, 375
General Metallurgy, 138, 227, 292
Report of the British Foundrymen's Association, 56
May Meeting of the Iron and Steel Institute, 459

Reviews, 69, 143, 229, 306, 388, 466

Catalogues and Trade Publications, 47, 137, 150, 156, 209, 219, 316, 396, 475

The World's Industrial Engineering Press 72, 151, 230, 308, 390, 470
